VFM836

8" LED Backlight Digital Photo Frame

Refresh Happy Moments with Vividly Playback

VFM836 brings together video, music, and photo for you to refresh your happy moments in life at any time!

VFM836 takes advantage of LED display technology. It not only saves poser, but also offers 200 nits brightness & 400: 1 contrast ratio with 800 x 600 resolution, photos.

VFM836 is more than a digital photo frame. It is also a mini multimedia center – it gives an all-around support of mainstream audiovisual formats such as JPG, MPEG4, and MP3, enabling you to play family videos, digital photos, and lively music as you please. The various multimedia play modes allow you to add any background music or transition animations to your slide show. You can create the most eye-catching display to share.

The built-in 4GB internal memory can store up to 8,000 of 5 megapixel images and keep more precious memories fresh. VFM836 supports multiple memory card formats to read the widest variety of image sources so that many of your albums can be managed centrally on this model.

USB ports allow you to connect to your flash drive device at any time to enrich the content of your audiovisual playback. An intuitive remote control makes VFM836 easy to share your videos and photos. Its manual photo rotation function allows you to view images from any angle you like. In addition, the simple, elegant design of VFM836's monochrome frame can coordinate with the color scheme of any space. You will have the most modern and stylish center for visual displays!

> LED-Backlit Display

The colors are brighter and the picture quality is greatly improved. Most importantly, the most vivid photos are displayed with low power consumption and environmental friendliness in mind.

> Bring Your Images to Life

With high screen resolution of 800x600, VFM836 delivers stunning picture quality, vividly showing every detail of a brilliant image. The built-in 1.5-watt speaker system allows you to share your happy moments with the accompaniment of music.

> Full Multimedia Support

VFM836 supports JPEG image format, MPEG4 video format, as well as MP3 music format. It also enables you to play your photos in the slide show, add transition animations to your slides, and adjust the transition speed.

> Large Storage Capacity

VFM836 is equipped with a built-in 4GB internal memory and supports memory card formats of SD, MMC, and SDHC. You can easily push the storage capacity to the limit.

> Smart and Ergonomic

VFM836 supports automatic slide show, an integrated remote control, and MP3 background music playing. It also has the auto on/off feature, offering a setting that is smart and ergonomic.
